

Idea Matrix

SOPHI-A

The flagship desktop product — GUI, product-shape and pricing ideas — status view as of 2026-09-16.

23 ideas tracked. 3 partial · 5 planned · 12 idea · 1 deferred · 2 declined

Legend: ■ BUILT — shipped · ■ PARTIAL — built, gaps remain · ■ PLANNED — scoped, not built · ■ IDEA — not scoped · ■ DEFERRED — has a named reopen trigger · ■ DECLINED — real reason on file

Product & GUI

Idea	Status	Notes	Source
Sophi-A visual identity (C&C; seat centered, seats arranged around it)	■ PLANNED	Design brief + research + screenshots done, waiting on Muad to run it through Claude Design.	FOCUS.md
TODO · Priority pill reads a new human-owned TODO.md, verbatim	■ PLANNED	Real answer settled, not built. Open: who may append/reorder/remove.	sophia-todo-advisor-emissary research
Advisor as cheap pre-debate triage / rubber-duck filter	■ PARTIAL	Advisor itself already shipped; this specific use-case flow is settled, not built.	FLAGSHIP-IDEAS
Emissary (drafts HANDOFF.md / status / commit text, never sends itself)	■ IDEA	Genuinely new seat concept, real use cases ranked, nothing built.	FLAGSHIP-IDEAS
Multi-session C&C; delegation as a built-in capability	■ PLANNED	Scoped, unanimous signoff: hub-and-spoke, cnc fixed coordinator, max-concurrent 4. Not dispatched.	IDEAS-INDEX
Seat Families (long-running delegated sessions, compassion-policy states)	■ PARTIAL	All 10 items built + reviewed on a branch. Nothing merged/pushed; families.enabled=false. 7 open decisions for Muad.	FOCUS.md
Local-model support as flagship differentiator	■ PARTIAL	THCMCP has it (v7.1); Sophi-A-specific positioning not built.	FLAGSHIP-IDEAS
Downloadable Sophi-A binaries	■ PLANNED	Tauri already produces native installers per platform — likely closer to done than assumed.	FLAGSHIP-IDEAS
Quick Setup: one OpenRouter key provisions the whole council	■ IDEA	Open question: does routing all seats through OpenRouter preserve cross-lab diversity?	FLAGSHIP-IDEAS
User-named seats, roleplay-style (starting with C&C;)	■ IDEA	Real UI/identity feature, needs its own design pass.	FLAGSHIP-IDEAS
Premium / Business pricing tiers	■ IDEA	A real pricing decision, not a GUI toggle — needs Muad's call.	FLAGSHIP-IDEAS
Website wallet (Steam-style balance, EUR + BTC, non-cashable)	■ IDEA	Custody/legal framing, metering design, BYOK relationship all unscoped.	FLAGSHIP-IDEAS

Idea	Status	Notes	Source
Voice input, routed to intent (never acts on raw audio)	■ IDEA	Real battleground is interruptibility, not recognition accuracy.	<i>IDEAS-INDEX long-horizon</i>
Dynamic spend control (adjust/cap live, not just warn)	■ IDEA	Needs a plan; --max-usd and --cost-today are the building blocks.	<i>Ideas.md 2026-09-13</i>
Sophi-A build seats fan out into subagents	■ IDEA	Needs orchestrator-change + cost-accounting + stop-all-semantics plan.	<i>Ideas.md 2026-09-13</i>
No green/yellow/red seat colors; real visual polish, breathing room	■ IDEA	Named as buildable now, no plan needed — check current GUI state.	<i>Ideas.md 2026-09-13</i>
Council Minor / Council Major (two presets, two prices, one engine)	■ IDEA	Not on FOCUS; Muad's call.	<i>Ideas.md 2026-09-13</i>

Strategy & positioning

Idea	Status	Notes	Source
Durable moat is not the algorithm	■ IDEA	Same open question as THCMCP — Sophi-A is candidate moat #1 (orchestration UX).	<i>IDEAS-INDEX</i>
Orchestration UX itself as the craft moat	■ IDEA	Making multi-agent work genuinely pleasant is slow for a competitor to copy well.	<i>IDEAS-INDEX</i>
Sophi-A/THCMCP merge into one runtime+clients product	■ DECLINED	Directly contradicts THCMCP's own CLAUDE.md — "do not conflate them."	<i>Ideas.md</i>
Full Android port	■ DEFERRED	Zero scoping done, biggest scope-creep risk of the pasted ChatGPT roadmap. No reopen trigger yet.	<i>Ideas.md</i>
Trust/risk-tier layer on agent actions	■ PLANNED	A second description of the open required_signoff_paths wiring gap.	<i>FOCUS.md item 6</i>
Subscription-seat-as-third-party-automation	■ DECLINED	Against Anthropic's own ToS, confirmed via a closed GitHub issue.	<i>subscription-seat-to-s-check.md</i>
